Subject: picnic*

Hallo Özge,
good morning.
3 wood-plates are left.
Please bring on Friday the plans of the "gecekondu-proposal" I left in
your office.
The Architekt who had done the plans try to come on friday around 19.00.

And Ichsan Bilgin we meet at 17.00 o'clock.
Please tell Vasif the new dates probably he has time to come?

And now to the printer:
In the price we got from the printer of Esen there was included :
- Blueprint, which is a testprint before the inside-pages of the book
are going to be printed.
- (fujii) prova which is again a testprint for the coloured cover of
the book.

Then I have to know how thick the book is going to be that is why the
printer should make a blank maquette of the book with the exact paper we
chosen for the printing.
I need that to prepare the printing of the cover of the book.

I hope when this printing document is going to be finished on friday you
got time to look after the printing with Esen that is book after all
that work is going to be OK.

Greetings
Erik
