

Dear Olga,

We hope that you had a lovely Christmas holidays with your beloved ones!

It was such a fantastic walking and talking meeting in Køge, we enjoyed it dearly. Now we have a different perception of the places where we visited together, even the other ones... We had some visuals from that day and prepared a dossier with a little surprise at the end (a ready-made in front of the municipal building!). Besides, a couple of photos of the plants by the river that you mentioned you use for dying textile are also included in the dossier. Here is the link that you can download:

Link of the wetransfer

We got very excited seeing your interview at the Politiken as if it is a vision / sign of your prospective work for the "Humming"! We wonder if you had any chance to incubate on your contribution to the exhibition. Do you already have any preferences on the format (performative talk / tour, performance, workshops or a public procession...)? According to your ideas there can be an installation around the tiny stream in the small woods where the witches of Køge were gathering at nights. The installation can be the result of the activity that you want to realize.

Certainly, we would like to talk to you when you think that you are ready. Just let us know.

Keep in touch,

Happy new year!

Our very best,

Ulrikke & Fulya
