

Dear Hector,

We do hope that you are well. As we are approaching to the opening, we are completing the last preparations.

We would like to inform you on the installation of *Urdiendo Ritmos* in the double-container at the industrial harbour. As you know we ordered two short throw projectors to be able to show it as big as possible. However, the short throw projectors are not as flexible as other projectors, having limited capacity for locating and fine tuning the image. Especially for the vertical image, the projector needs to be installed just next to it. We weren't happy with the result, so, we ordered big monitors with 157cm wide screens. We think that they are big enough for the space. The monitors are in transport right now, when the work is up and running, we'll send you photographs.

The opening of the *Humming*s exhibition, our joint project will be held on the 14th of August at 3.30 pm also at the industrial harbour of Køge. Below you can find the opening programme, which we will also send you in a separate mail so that you may share it with friends, colleagues and contributors.

We thank you extensively for your precious contribution to the exhibition and will catch up as soon as possible after the *Humming*s opening to plan the implementation of Nautilus (working title) in Køge Marina.

Keep in close contact,

Our very best,

Ulrikke and Fulya
